The following action is in response to the proposed amendment-after-final received March 4, 2008. The proposed amendment has been approved for entry.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The Abstract has been rewritten to read as follows:

---ABSTRACT OF THE DISCLOSURE

A dual function handlebar mounted actuator has first and second function operating devices arranged for activation by movement of a hand operated lever arrangement. The first and second functions operating devices are linked so that a combined first and second function can be activated and the first and second functions are a clutch and a brake function. The actuator has a lever movable between a first and a second position, and a master cylinder having a piston with the lever moving towards the second position to drive a piston from its initial position thereby increasing pressure in the master cylinder. By releasing the lever the pressure within the master cylinder is arranged to return the piston towards its initial position and the piston being returned fully to the initial position upon movement of the lever to the first position.----

The above changes to the Abstract eliminate legal phraseology and reduce the length to be within the 150-word limit.

Allowable Subject Matter

Claims 107 and 111-113 are allowed. Claims 107 and 111-113 will be renumbered for printing as claims 1-4, respectively.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to anticipate or render obvious a dual function handlebar mounted actuator as defined in claim 107, particularly wherein activation of the lever in a second direction activates said brake function and continued activation of the lever in said second direction activates said clutch function.

The art of record also fails to show or render obvious a dual function handlebar mounted actuator as defined in claim 111, including means for sensing an R.P.M. of an associated engine, wherein the lever is arranged so that when the sensed R.P.M. is above a first predetermined value, movement of a first portion of the lever will result in operation of said brake function, and wherein when the sensed R.P.M. is below the first predetermined value movement of the first portion of the lever will result in operation of said brake function and said clutch function so as to prevent stalling of the engine.

The prior art of record fails to anticipate or render obvious a dual function handlebar mounted actuator as defined in claim 113 wherein movement of the lever in a first direction operates said clutch function, movement of the lever in a second direction operates said brake function, the dual function handlebar further includes a combined function means arranged so that when the lever is moved in said first direction to an initiation point said combined function means causes the lever to also move in said second direction so that both said clutch function and said brake function are operated.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Amendment

Since the remaining claims are allowable for the reasons set forth above under "Reasons for Allowance", the rejections under 35 USC 102(b) and 35 USC 103(a) set forth in the previous Office action are withdrawn.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rodney H. Bonck whose telephone number is (571) 272-7089. The examiner can normally be reached on Monday-Friday 7:00AM - 3:30PM.
